Fish Disease-Parasite-Pathogen Certification Stipulations

~ 2008 ~

The licensed fish farm or other facility where the source fish were raised or reared, must be certified free of the diseases and causative agents specified below. Certification must be performed within 12 months of the date of purchase/importation unless otherwise stipulated. If fish are brokered from other facilities, certification **MUST** be included for all facilities where subject fish were held.

All species must be certified free of the following:

Egtved Virus, Viral Hemorrhagic Septicemia Virus – VHSV

If importing fathead minnow, goldfish, or red shiner:

Spring Viremia of Carp – SVC *Rhabdovirus carpio*

If importing golden shiner or from a facility that raises golden shiner:

Golden Shiner Virus - GSV

Spring Viremia of Carp – SVC *Rhabdovirus carpio*

All fish deliveries must be free of all non-target organisms including unauthorized fish species, crayfish, plants, snails, mussels, etc.

Fish cannot be stocked from a facility undergoing any type of epizootic disease or parasite event whether or not the disease or causative agents are listed above.
